

Here's great family holiday tradition... with a twist! Take turns sliding the wheel for LOTS of different ways to sing everyone's favorite Christmas tunes!

Print all three pages out on card stock. Carefully cut around each circle. When cutting out the "window" in the top wheel - be sure to leave enough tagboard around the area where the brad hole will be punched.

Take a pointed object, such as a Phillip's head screwdriver, and twist to create a small hole in the middle of each wheel.

Layer the wheels on top of each other, with the largest one on the bottom.

Use a brad to go from top to bottom to fasten the wheels together.

Now, have fun sliding the top window to select a song. Next, turn the bottom wheel to determine how the tune will be sung! Make sure to try all the different ways to sing each song!
